Timberline HDZ® Shingles

Benefits:

- **LayerLock™ Technology** — mechanically fuses the common bond between overlapping shingle layers
- **Up to 99.9% nailing accuracy** — the StrikeZone™ nailing area is so easy to hit that a roofer placed 999 out of 1,000 nails correctly in our test¹
- **WindProven™ Limited Wind Warranty** — when installed with the required combination of GAF Accessories, Timberline HDZ® Shingles are eligible for a wind warranty with no maximum wind speed limitation²
- **Dura Grip™** sealant pairs with the microgranule surface of the StrikeZone™ nailing area. Then, an asphalt to-asphalt monolithic bond cures for durability, strength, and exceptional wind uplift performance.
- **25-year StainGuard Plus™ Algae Protection Limited Warranty** against blue-green algae discoloration.³ Proprietary GAF Time-Release Algae-Fighting Technology helps protect your shingles from unsightly stains.
- **For the best look** — use TimberTex® Premium Ridge Cap Shingles or TimberCrest® Premium SBS-Modified Ridge Cap Shingles

How Much Money Will You Save?

Energy Savings with Radiant Barrier Foil

Consumers are less concerned about how energy barriers work than they are about their effect on utility bills. This is much less than the 95% reduction in attic radiant heat flow because other forms of heat flow contribute to the total cooling (or heating) load. Data can expect to vary with region. The following data provided by The *Tennessee Valley Authority*, Chattanooga, Tennessee on *Performance Testing of Radiant Barriers* demonstrates the savings possible for a typical home:

- All the Radiant Barrier configurations yielded sizable percent savings and statistically significant reductions in summer attic heat transfer compared to the non-RB case. Also, as the ambient temperature increases, the savings also increase.
- The Radiant Barrier under the rafters (RBR) was the best summer performer. It consistently showed heat flux reductions compared to the non-RB case of nearly 40% for almost all ambient temperatures and even showed savings during mild temperature and night summer conditions.
